

ANALYSIS FOR FIRST QUARTER 2025

This is the breakdown analysis for the first quarter and how fare the company did with the trips. We had a total scheduled trips of **237** from January across to April. We will be breaking down how many trips each month had, how many was completed, how many was cancelled. Starting with January, the company recorded **46** trips, **35** trips were Ambulatory while **9** trips were Wheelchair and **2** trips were Stretcher. The company was able to complete **26** trips while **20** was cancelled due to several reasons. In the month of February, the company recorded **53** trips, **34** trips were Ambulatory while **11** trips were Wheelchair and **8** trips were Stretcher. The company was able to complete **41** trips while **12** trips were cancelled. In the month of March, the company had the highest scheduled trip with total of **76** trips, **40** trips were Ambulatory trips, **21** trips were Wheelchair and **15** Stretcher trips were recorded. The company was able to complete **63** trips while **13** was cancelled. Finally, in the month of April the company had a scheduled **62** trips, **35** were Ambulatory, **12** were wheelchair and **15** stretcher trips were recorded. The company was able to complete **40** trips **22** trips was cancelled.

The scheduled trip kept increasing as the month passed by and the completed section the company was able to complete most of the trips per month, the company was averaging **11-24** trips cancelled per month in the first quarter (**67** in total) which was mainly due to the member cancelling the trips or the company transportation was not able to pick the member up.

1. How can the company reduce cancelled trips for the second quarter which will boost more revenue?
2. How can the company ensure wheelchair and stretcher trips can be completed during the second quarter?
